The ICT-BPO sector has been targeted as one of the activities with large increment in the last years. The top outsourced activities in Albania are Data entry and Call Centers, which export services to EU countries, mainly Italy. The ICT-BPO sector in Albania has the potential to further expand in two ways. Firstly, by taking advantage of the multilingual capabilities of its population, Albania aims to attract foreign investors which can export the already present services to a wider market in Western Europe. Secondly, the ICT-BPO sector shows the prospective to further develop by jumping into higher margin/niche services and by diversifying the range of its activities, attracting investments related to more complex processes in Finance & Accounting, Digital processes, Software Design and Development, Block-chain technologies, Cyber-Security, etc. Albania has transformed into a major destination for ICT-BPO services with its urban culture, availability of resources, infrastructure and attractive Investment Incentives. Tirana is the main ICT-BPO hub of Albania, followed by Durrës, Shkodër and Vlorë. The ICT-BPO sector in Albania has seen steady growth since its inception, increasing employment and reaching industry values that exceeds $130 Million.

WHY INVEST IN ICT AND BPO

INFRASTRUCTURE AVAILABILITY

- High Internet Penetration and Fixed Line Connectivity;

- Highest level of mobile phone penetration in the region, amounting to 1,875 subscriptions per 1,000 inhabitants;

- 63% of population has 3G/4G broadband access, while 50% of families have fixed broadband access;
