ABOUT THE FAIR

The Energy, Construction & Green Economy 2025 trade fair returns for its fourth edition on **29-30 October 2025** at the Palace of Congresses in Tirana. As a leading platform for the energy and construction sectors in Albania and the region, this fair serves as a hub for industry leaders, innovators, investors, and policymakers to explore the latest trends, challenges, and opportunities in sustainable energy and construction.

This edition places a stronger emphasis on innovation, technology, and collaboration, bringing together key stakeholders to discuss the region's most pressing sustainability challenges and showcase solutions that drive Albania's green transformation.

KEY FIGURES FROM 2024

70+

exhibitors

2,500+

professional visitors

15%

participation

70+

media features across TV,
online, and print channels

Last year's success sets the stage for an even more dynamic 2025 edition. For detailed SYNOPSIS from last year's edition, [click here](#).

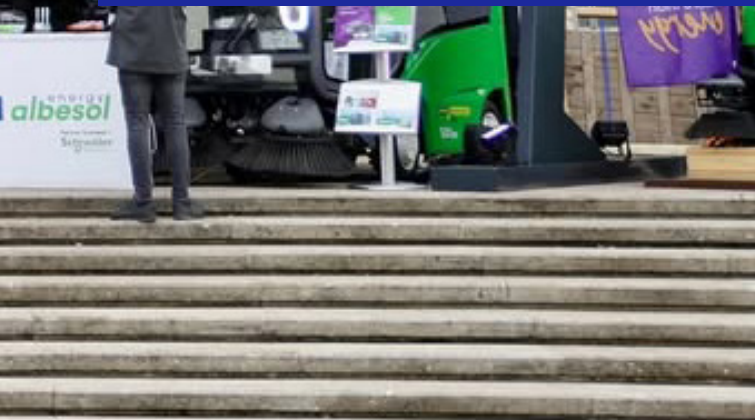

WHY EXHIBIT?

- I. Position your company as a leading force in the industry.
- II. Expand your network and accelerate business growth.
- III. Connect across the entire industry value chain.
- IV. Showcase your products and services to a highly targeted audience.
- V. Stay ahead of the curve with the latest trends and insights from top experts locally and globally.

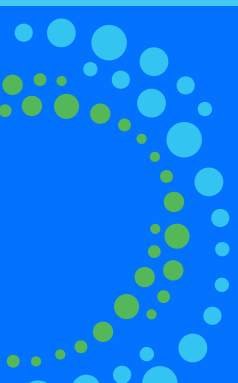

EXHIBITION SECTORS

The fair will feature a comprehensive range of exhibitors from diverse industry sectors:

ENERGY:

- Renewable energy producers (*solar, wind, hydro, bioenergy, geothermal, and gas*).
- Photovoltaic technologies and innovations, from manufacturing to installation and integration.
- Hydrogen production, storage, and application technologies as part of the clean energy transition.
- Sustainable buildings and smart city solutions, integrating energy-efficient designs and renewable systems.
- Advanced power electronics, intelligent motion systems, and energy management technologies.
- Energy efficiency and management systems.
- Smart grids, infrastructure, and automation technologies.
- Electric mobility and sustainable transport solutions.
- Energy storage, transmission, and distribution technologies.

Ensure you don't miss this opportunity!
